SHRIMP FISHERY, 1887-1965

The shrimp fishery is our most valuable fishery. In 1965, the value of the catch exceeded $82.4 million--$12 million greater than in the previous year and 26 percent more than the second most valuable item, Pacific salmon. More than 16 thousand fishermen in over 3,500 vessels and 8,600 boats operated in this fishery in 1965.

Imports of shrimp increased from 40 million pounds in 1950 to 179.0 million pounds (heads-off weight) in 1965 and is the most valuable fishery item imported. In 1965, imports from 62 countries were valued at $113.8 million and accounted for 54 percent of the total United States shrimp supply of 331.3 million pounds (heads-off weight).

The importance of the industry and the growing interest in data on shrimp, gave rise to the preparation of this report. No attempt has been made to record historical operating unit data. For detailed data on operating units for years since 1957, see the major fisheries section of Fishery Statistics of the United States. For years prior to 1957, refer to operating units by gear for each of the States in which shrimp were taken. To assist in locating data, there follows a reference guide to the information and the pages on which it appears.
